

Flight Design CTLS N447DP

CTLS N447DP

This 2016 Flight Design CTLS is exactly the same as the newest model with only 145 hours. The plane is high-end and smartly designed with comfort and performance in mind. With a 49 inch wide cabin (one of the largest in it's class), Extra-wide dual gull wing cabin doors and adjustable seats, this aircraft can accommodate people well over 6 feet tall.

It's no surprise that a company with the word "Design" in their name has created such a plane. The smart features continue inside as well. The automobile inspired cockpit is organized and ergonomically efficient; including the placement of every button, switch and dial. The leather seating and carbon fiber appointed interior are a nice bonus! The panel is very well configured with Dynon 100 EFIS & Dynon EMS dual glass touchscreen displays, a Garmin SL40 comm, Garmin 696 GPS, BRS Chute and night flight package.

CTLS N447DP

The Rotax 912iS engine will provide excellent reliability and performance along with a 2000-hour TBO . This is the latest fuel injected engine, both power and economy modes are displayed on the EFIS screen. Fill-up on either 100LL or premium auto gas, consume less than 5 gallons per hour at econo cruise and enjoy the comfort of the cabin and ease of flight on longer missions.

The 49 inch wide cabin gives the CTLS a jaunty stance and a readiness to fly!

Dual gull wing doors provide ease of entry.

CTLS N447DP

Stainless steel rudder pedals, leather wrapped stick handles, a full autopilot system, ADSB in and out and hand pumped lumbar supports are just a few of the special features this beauty has to offer.

50 lb. baggage compartments are located on each side of the plane; for an impressive 100 lb. total.

CTLS N447DP

Purchase includes 5 hours of CFI instruction and flight checkout (Includes Biannual Flight Review) and 10 hours of ground school.
